👤 ABOUT ME

Solving Real Problems

I am a **Full Stack Developer** who loves turning ideas into functional, scalable web applications. I am passionate about building real-world systems such as e-governance platforms, blogging websites, and study tools. Every project is a chance to deliver meaningful solutions.

Beyond writing code, I work as a **Business Development Executive at TechEniac**, bridging the gap between client requirements and technical execution. This unique blend of business acumen and technical skills allows me to design products that work flawlessly and deliver strong business value.

🏢 PROFESSIONAL EXPERIENCE

Career Milestones

Business Development Executive 2024 - Present
TechEniac

Working at the intersection of technology and business to collaborate with clients, analyze project requirements, and ensure technical teams deliver exactly what is needed.

- Engaging with clients to gather and analyze business requirements.
- Collaborating with cross-functional technical teams to deliver custom projects.
- Preparing proposals, technical specifications, and pitches for potential clients.
- Identifying new business channels and maintaining positive client relationships.
